Superintendents and School Administrators,

An updated “Low Risk, Test and Return” protocol is now available for schools. The protocol is outlined below and is allowed to be implemented immediately. The protocol is as follows:

A student, teacher, or staff member who was exposed at school to someone who tested positive for COVID-19 may return to work at a school or in-person learning if he or she meets ALL of the following:

1. The school verifies the student, teacher or staff member who was exposed and the person who tested positive were both wearing a face mask as defined by the [State Public Health Order](#) on masks in schools.
2. The quarantined student, teacher, or staff member has a negative COVID-19 test result (must be a PCR or antigen test, not an antibody test). The test result must be from at least 7 days after the last exposure to the person who tested positive.
3. The student, teacher, or staff member does not have symptoms of COVID-19.

The Low Risk Test and Return protocol does not apply to students, teachers, staff, or settings that are exempt from the [State Public Health Order](#) on masks in schools.

If the student, teacher, or staff member who was exposed meets ALL three criteria he or she may return to work, school or related activities, if the employee or the parents of the student choose. If the person does not meet ALL three criteria or chooses not to get tested, he or she should quarantine at home for 14 days from the last day of exposure.

Anyone who has been exposed to COVID-19 and comes back to school must continue to watch for symptoms. If employees or students get symptoms, they should isolate at home and call their healthcare provider.

These guidelines only apply to exposures that occur at school.

For more information, please contact your local Central Utah Public Health Department office.

Nathan Selin
Executive Director
